 - c. I, II, V
 - d. I, II, IV, V
5. Under the A201 General Condition, which one of the following is **not** one of the architect's duties during construction?
- a. Reviewing samples and other submittals from the contractor.
 - b. Responding to contractor questions regarding the design.
 - c. Adjudicating disputes between the owner and contractor.
 - d. Making site visits to ensure that the construction is proceeding in accordance with the contract documents.
6. In a typical construction project, who are the proper parties to sign the A201 General Conditions?
- a. The owner, the contractor and the architect.
 - b. The owner and the contractor only.
 - c. The contractor and each subcontractor.
 - d. No one signs the A201 General Conditions.

7. A property survey contains an error that the architect does not discover, thereby causing the architect to design a building that extends beyond the property lines. Under the A201 General Conditions, who is responsible for the cost of the corrective measures?
- a. The contractor.
 - b. The owner.
 - c. The architect.
 - d. The neighbor into whose property the building extends.
8. A construction worker is hurt in an unshored trench on a construction site in which all of the companies are working under AIA form contracts. Which of the following is true?
- a. The worker may sue the architect, and who wins will depend on the architect's actions at the jobsite.
 - b. The worker cannot sue the architect successfully because there is no contract between them.
 - c. The primary defendant in the worker's lawsuit is usually the worker's employer, who has primary responsibility for its workers' safety.
 - d. The claim must be resolved in arbitration (or mediation) rather than litigation in court because the AIA form contracts contain mandatory arbitration (and mediation) provisions.
9. Construction Drawings are typically inclusive of?
- I Full performance specifications
 - II Details fully showing all pertinent information shown in one place, but referenced in multiple sheets
 - III Shop Drawings bound in after structural, but before MPE drawings
