digital design workshops

Learn software & workflows from architects practicing at the world's best firms. Live!

Live, online via GoToMeeting or in-person at the Merchandise Mart Holiday Inn, Chicago
Saturday, September 27, 2014 9-5pm

You will draw & build digital models of the Stahl House (Case Study #22) & you will learn the tools required to take this project from conceptual to the schematic design phase.

In each session, we'll highlight what is unique about the software & where it is most powerful so you can leverage its power in your own work.

We'll also spend time reviewing usefull workflows between key software.

After the workshops, the instructors will convene for an open discussion about the impact of digital design technology on your design work.

Workshops:
- Architecture Software Crash Course
- Revit 2015
- Sketchup Pro 2014
- Rhino 5
- AutoCAD 2015
